Your ball.

About 30 minutes. Do it for your own business. Nobody marks this; it's yours, and you'll use it in every module that follows.

1
Map your eight parts. One name on each.

2
Name your weakest part.

3
Turn one live decision through all eight.

What sits in each part

Use these prompts to spot what belongs where. Cross out what doesn't apply, add what's missing.

Pair	Part	Prompts
The work	**Process**	How an order or project goes start to finish · the tools you run on · where files live · passwords and access · anything written down
	People	Hiring paperwork · contracts · getting people started · holidays, sickness, leave · people leaving · who does what
The money	**Commercial**	Prices · quotes and proposals · discounts · payment terms · customer contracts · who can agree non-standard terms
	Finance	Invoicing · chasing payment · paying suppliers · payroll · bookkeeping · setting tax aside · knowing your cash
The rules	**Legal**	How the company is set up · contracts with customers, suppliers, staff · who owns the work · renewals
	Compliance	Filings and registrations · personal data · health and safety · insurance · licences · showing you follow the rules
Control	**Governance**	Who signs contracts · who approves spending · who decides hires and prices · who gets told · how often you check
	Risk	What would hurt most · relying on one client, supplier or person · backups · what you'd do if it happened

This map is for recognition only. It isn't a legal or compliance check. Which obligations apply depends on your business, your sector and where you operate. Module 4 covers how to find out, and when to call a professional.

Step 1 · about 15 minutes

Map your eight

One name per part, not a team. If it's you, write **me**. Owned means someone other than you could explain it. Slipping means the first sign you'd see: a late invoice, a missed renewal, a question nobody can answer.

Part	The main work	Who looks after it	Where it lives	How I'd know it's slipping	Circle one
Process					Owned Only me Unsure
People					Owned Only me Unsure
Commercial					Owned Only me Unsure
Finance					Owned Only me Unsure
Legal					Owned Only me Unsure
Compliance					Owned Only me Unsure
Governance					Owned Only me Unsure
Risk					Owned Only me Unsure

Apart from me, who sees the whole ball?

Step 2 · two minutes

Your weakest part

The part I'd least like an investor to ask about

Usually one marked Only me or Unsure.

Step 3 · about 15 minutes

Turn one live decision

The decision

A new client, a hire, a price, a supplier. Something live now.

Process
What changes in how the work gets done?

People
Who does it, and do they have the time and skills?

Commercial
Do the price and the terms work for us?

Finance
When does cash go out, and when does it come in?

Legal
What are we agreeing to, and who owns what?

Compliance
Which rules apply, and could we show we follow them?

Governance
Who is allowed to decide this, and who needs to know?

Risk
What could go wrong, and could we live with it?

What I'll change before I say yes

Which part did you not know was yours?

Bring this to module 2.
